ISHU SAINI

UI/UX DESIGNER

ishusaini0239@gmail.com • +91-7906353106 • Zirakpur, Chandigarh • linkedin.com/in/ishu-saini

PROFESSIONAL SUMMARY

Results-driven UI/UX Designer with 2.5 years of experience designing user-centered digital products for web and mobile platforms, with 5+ end-to-end projects across AI, SaaS, e-commerce, corporate, healthcare, and enterprise experiences. Proficient across the full product design lifecycle, from user research and design thinking to wireframing and high-fidelity prototyping in Figma and Adobe XD. Strong foundation in interaction design, visual design, information architecture, user journey mapping, responsive design, and scalable design systems. Works closely with product managers and developers to turn business requirements into implementation-ready designs that balance user needs with business goals.

WORK EXPERIENCE

UI/UX Designer — April 2024 – Present

GrootNet Software Solutions | Zirakpur, Chandigarh

• Applied design thinking and user research methods, including user interviews and competitive analysis, to guide interaction design decisions for responsive web and mobile applications.

• Translated business requirements and stakeholder feedback into user flows, wireframes, and high-fidelity interactive prototypes in Figma, using Auto Layout, Variables, and reusable components.

• Partnered cross-functionally with product managers and developers throughout design handoff, ensuring pixel-accurate and accessibility-conscious implementation within Agile/Scrum sprint cycles.

• Conducted usability testing and heuristic evaluations, then iterated on interaction and visual design based on qualitative user feedback to reduce friction across key user journeys.

• Built and maintained scalable design systems and component libraries in Figma, standardizing UI patterns and improving design-to-development consistency.

KEY PROJECTS

GrootVox – AI Voice Agent Platform

AI voice agent SaaS platform for real business conversations

Focus: UI/UX Design • Design System • AI Product Experience • HTML/CSS Handoff
Challenge: Explain a technical AI voice product clearly to business buyers across inbound and outbound calling, booking, handoff, and industry use cases.
UX Approach: Structured information architecture and visual hierarchy so capabilities and industry solutions are easy to scan and compare.
Interface: Designed reusable UI patterns and responsive layouts for the live product, then collaborated with developers through HTML/CSS implementation and handoff.
Outcome: Delivered a live, responsive AI SaaS website with a consistent component language.

Atelise – Custom Fashion & E-commerce Experience

Premium fashion and e-commerce experience for made-to-measure clothing

Focus: E-commerce UX • Product Discovery • Responsive UI • Visual Storytelling
Challenge: Make made-to-measure clothing as easy to browse and buy as ready-made products while explaining a multi-step journey.
UX Approach: Created two clear entry points—browse the design library or design your own—along with a guided studio flow covering Design, Fabric, Checkout, and Measurements.
Interface: Designed editorial-style typography, product cards, a filterable fabric library, live preview, fabric selection, and a persistent add-to-bag action.
Outcome: Delivered a guided live e-commerce experience from design discovery through measurements.

GrootNet Softwares – Corporate Digital Experience

Corporate website for an AI-powered software development and digital transformation company

Focus: Corporate UX • Service Discovery • Component-Based UI • Angular • Developer Collaboration
Challenge: Present a broad range of services, industries, and proof of work clearly enough for visitors to find relevant information quickly.
UX Approach: Organized services, industries, why-choose-us content, and social proof into a scannable hierarchy with conversion-focused calls to action.
Interface: Created a SaaS/AI visual language with reusable card components and gradients across the home page, service pages, and case studies. The website is built in Angular.
Outcome: Delivered a live corporate website with dedicated service pages and detailed case studies.

Ticketing Portal – IT Solutions Client App

Enterprise ticketing portal with a focused authentication experience

Focus: Portal UX • Authentication Flow • Enterprise UI • Form Design
Challenge: Give users a clear and trustworthy entry point to a ticketing portal with minimal friction.
UX Approach: Focused the sign-in experience around two fields, a visible forgot-password path, and a password reveal toggle.
Interface: Designed a split-screen layout with a branded panel and a clean form using icon-led inputs and a clear primary action.
Outcome: Delivered a live, focused sign-in experience for the ticketing portal.

AI Cloud Health – Clinic & Hospital Management Platform

All-in-one healthcare SaaS platform for digital clinic and hospital management

Focus: Healthcare SaaS • Dashboard UI • Landing Page • Content Hierarchy
Challenge: Explain a multi-role healthcare platform covering dashboards, appointments, prescriptions, and invoicing clearly to clinics and hospitals.
UX Approach: Grouped capabilities into scannable feature blocks, followed by product previews, FAQs, and repeated demo calls to action.
Interface: Designed a calm healthcare visual system with icon-led feature grids and an early dashboard preview to communicate the product quickly.
Outcome: Created the product landing page and dashboard experience; the project is currently in development and not publicly live.

SKILLS

Design Tools:	Figma, Adobe XD, Adobe Illustrator, Adobe Photoshop, Canva
UX Skills:	User Research, User Interviews, Design Thinking, User Journey Mapping, Information Architecture, User Personas, User Flows, Usability Testing, Heuristic Evaluation, Competitive Analysis
UI Skills:	Wireframing, Prototyping, Interaction Design, Visual Design, Design Systems, Component Libraries, Responsive Design, Mobile-First Design, Accessibility (WCAG), Material Design, Human Interface Guidelines
Frontend Knowledge:	HTML5, CSS3, SCSS, Bootstrap, JavaScript, TypeScript, React, Angular
Collaboration Tools:	Git, VS Code, Jira, Agile, Scrum, Sublime Text
AI Tools:	ChatGPT, Cursor AI, Claude AI, AI Product Design

EDUCATION

MCA – Master of Computer Applications Gurukul Kangri Deemed to be University, Haridwar	May 2021 – Aug 2023
BCA – Bachelor of Computer Applications Chaudhary Charan Singh University, Meerut	May 2018 – Jun 2021
Higher Secondary (12th) UP Board	2017 – 2018
Senior Secondary (10th) UP Board	2015 – 2016
